Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

The Position

Senior Business Systems Analyst

The Senior Business Systems Analyst will be responsible for supporting Strategic Pricing and Contracting Management (SPCM) systems planning and business process support, including contract development, contract administration and government price reporting operations. This role supports alignment of business processes and systems to provide accurate business monitoring, analytics and operational excellence across SPCM Teams.

The Senior Business Systems Analyst will be responsible for providing leadership on system projects including data analysis, user requirement gathering and documentation, business process documentation, and impact and gap analysis. They will serve as the subject matter expert for contract development, contract administration and government price reporting business processes, and the Veritas applications.

The Senior Business Systems Analyst will need to develop an understanding of the complex data environment in order to enhance standard reports, perform analysis and develop ad hoc queries and reports. This position requires the ability to retrieve data from multiple environments, identify trends, perform analysis and make recommendations. They may also lead or participate in developing data management strategies (including MCCO IT initiatives

such as with the Channel, Customer and Contracting Performance, C3PI Initiative) and implementing accurate infrastructure for robust and high-accuracy analytics. The position also requires strong written and verbal communication skills and an ability to collaborate with management and other functional groups within the Commercial organization. The data analysis will also support the SPCM Operational Excellence program that will be driven by existing and new metrics.

This position will be expected to have an up-to-date knowledge of the enterprise IT strategic direction and be able to influence IT system decisions that will be cost-effective, supportable and scalable. This will require strong leadership on projects and in the prioritization of the overall project portfolio, developing business cases and driving to maximize sIT ROI. This position reports to the Group Manager, Strategic Pricing and Contract Process and Technology.

Who You Are

- BA or BS degree in Management Information Systems, Statistics, Finance or related fields; or an equivalent combination of education and experience.
- 6+ years experience as a Senior Business Systems Analyst
- Demonstrate advanced proficiencies in SQL and various reporting and data analysis applications (MS Access, FileMaker Pro, Business Objects, Cognos a plus)
- Proven skills in financial and portfolio management
- Proven skills in relationship building, customer-focus, decision-making, and problem solving
- Demonstrated ability to quickly learn the business in unfamiliar areas
- Must be able to manage multiple priorities and projects simultaneously
- Must be a self-starter, results-oriented and have a track record of timely high-quality deliverables
- Experience interacting with all levels of IT and business unit management
- Excellent verbal/written communications skills; strong presentation and negotiation/conflict resolution skills•Pharmaceutical biotech experiences preferred
- Knowledge of Government price calculations and compliance regulations, and business practices in complying with these regulations preferred
