

## Postdoctoral Research Fellow - Oncology

Job ID: 00408046

**Job Function**

Research

**Schedule**

Full-time

**Location**

United States-California  
South San Francisco

**Job type**

Special Programs

**Company/Division**

Pharmaceutical

**Job Level**

Experienced

### Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

### The Position

**Responsibilities:** A postdoctoral position is available to study oncogenic pathways in breast cancer. Strong molecular and cellular biology skills are required. The successful candidate should have familiarity with mutagenesis, RNAi, signal transduction, and protein characterization. Candidates with a strong background in protein structure and function will also be considered. A practical working knowledge of bioinformatics analysis would be desirable. The successful candidate will be required to work in a highly collaborative and multi-disciplinary environment. See recent publications: Cancer Cell 20:472 (2011); Cancer Cell 15:429 (2009); Cancer Res 68:9280 (2008).

### Who You Are

**Requirements:** Ph.D. in Biochemistry, Pharmacology, Molecular or Cell Biology or related field. Experience with signal transduction studies is highly desirable.

Genentech is an Equal Opportunity Employer.
