Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

The Position

We are seeking an energetic and accomplished Research Associate/Senior Research Associate in Early Discovery Biochemistry within Genentech. Our group conducts early drug discovery and new target validation from a biochemical/physical, structural, and computational perspective and collaborates with diverse discovery biology areas in Genentech. The candidate must have excellent skills with directed evolution techniques, such as phage display, yeast display, and/or mRNA display. Preference will be given to candidates who also have experience in computational biology and/or biophysics. Projects will span a wide range of areas, and the candidate must be flexible, creative, and able to master new techniques as needed.

Who You Are

The successful applicant will have an MS/Ph.D. in biochemistry, genetics, or structural biology. A minimum of 3+ years of direct experience is required.

Genentech is an Equal Opportunity Employer.
