

## **Associate Scientist - Protein Analytical Chemistry**

Job ID: 00411121

### **Job Function**

Technical Functions and Maintenance

### **Schedule**

Full-time

### **Location**

United States-California  
South San Francisco

### **Job type**

Regular Employee

### **Company/Division**

Pharmaceutical

### **Job Level**

Experienced

## **Who We Are**

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

## **The Position**

An Associate Scientist position is available in the Protein Analytical Chemistry Department (within US Biologics Pharma Technical Development, PTDU). The selected candidate will be responsible for developing, optimizing, and performing analytical methods to characterize recombinant protein therapeutics and antibody drug conjugates using techniques such as high-performance liquid chromatography (HPLC), mass spectrometry (MS), and capillary electrophoresis (CE). This will include development, optimization and validation of analytical methods to be used for characterization and/or quality control of therapeutic protein and ADC candidates. This individual will provide analytical support to different functional groups in PTDU and actively participate in project teams consisting of members from all areas of process development. This individual may be responsible for managing 1-2 research associates, depending on experience level.

## **Who You Are**

Requirements:

- A Ph.D. in Analytical Chemistry, Biochemistry, Chemical Engineering or related discipline with 0-2 years industrial/post-doctoral experience is required.
- Theoretical/practical expertise in LC-MS analysis of proteins/peptides, and competence with software for mass spectrometry data analysis is highly desirable. Knowledge of analytical characterization of proteins and fundamentals of separation techniques such as U/HPLC and CE is required.
- The candidate must be highly self-motivated, have excellent organization, oral and written

communication skills and be willing to work both independently and as a team member. The candidate is expected to present data at internal and external meetings when appropriate.

- The candidate must be willing to work in a dynamic, fast-paced environment, and be capable of handling multiple tasks while meeting timelines.

Genentech is an Equal Opportunity Employer.
