

Scientist/Sr Scientist - Discovery Antibody Engineering

Job ID: 00412105

Job Function

Research

Schedule

Full-time

Location

United States-California
South San Francisco

Job type

Regular Employee

Company/Division

Pharmaceutical

Job Level

Experienced

Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

The Position

The successful candidate will participate in cross-functionalproject teams discovering

antibodies with high therapeutic potential to address major unmet medical needs across different therapeutic areas. This hire will lead a group discovering antibodies from immunized sources. Research by this group will include enhancing understanding and optimizing the immune response in immunized mice plus isolation and culturing of antigen-specific B cells. This individual is expected to collaborate closely with colleagues in other antibody discovery groups and other departments.

Who You Are

Requirements for this position include a PhD, MD or MD/PhD degree plus post-doctoral training or equivalent experience in immunology or a related discipline. Well-qualified candidates will have 5+ years experience in B cell research with strong cellular immunology and molecular biology skills as evidenced by publications in high impact journals. Prior experience in antibody drug development is a plus. Strong motivation, inter-personal skills and excellent communication abilities are needed for this role.

Genentech is an Equal Opportunity Employer.
