Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

The Position

Title: Engineer I

Job Category: Manufacturing

Department: Process and Project Engineering

Level: E2/E3

Responsibilities:

This position is for a Process Engineer reporting to a Manager in the Process and Project Engineering Group in the South San Francisco Production Technology Department. The candidate will be responsible for Process Engineering and Project Management of both Drug Substance and Drug Product projects for the SSF Production Business Unit. Primary responsibilities include supporting design, construction, startup, and upgrades to manufacturing equipment. The candidate will provide mentorship and direction to partner MSAT groups on execution of process engineering design and project management. The candidate will also provide Process Engineering services such as approval of P&ID changes, IQ, Material of Construction forms and ECOs on a rotating basis. In addition, the candidate may support development of business process improvements to support efficiency. The candidate will be hired as an Engineer I or Engineer II based on level of experience.

Who You Are

A B.S or higher in Chemical, Biochemical or Mechanical Engineering or related discipline with 1 - 5+ years of relevant experience. An M.S., M.B.A. or other advanced technical or business degree is desirable. The candidate must have demonstrated capability to innovate and deliver business systems. The candidate must have a passion for customer service to the diverse cGMP manufacturing customers in Drug Substance and Drug Product as well as the MSAT and quality organizations. A good understanding of Process Engineering, Project Management, Engineering Change Control and Validation is highly desired. Knowledge of service partner organizations such as Corporate Engineering and QA is also highly desirable. The candidate must be highly self motivated, have excellent organization and communication skills, be willing and able to work independently and as part of a multi-disciplinary team. The candidate must be comfortable with change and be willing to establish and work towards the future vision for the organization.

Genentech is an Equal Opportunity Employer.
