Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

The Position

E3

We are seeking a highly motivated Senior Research Associate/Research Associate with interest and expertise in oncology drug discovery research. The successful candidate will work on research project focusing on new oncology target identification and functional validation using genomics as well as molecular, biochemical, and cell biology techniques. In particular, the successful candidate is expected to design, perform wet lab experiments, generate and interpret experimental data with minimal supervision. You will also provide support for multidisciplinary efforts focused on target evaluation and drug development.

Who You Are

A BS/MS or PhD in Molecular Biology, Tumor Biology, Cell Biology, Biochemistry, or a related discipline with 4-10 years of industry and/or academic lab experience is essential. Strong molecular and cell biology skills are required. The Research Associate/ Senior Research Associate must have expertise in basic molecular biology techniques such as PCR, cloning, cell culture, RNAi, signal transduction and protein characterization skill. The candidate should be self-motivated and possess excellent critical thinking skills. Excellent oral/written communication skills are expected of the candidate. Ability to manage multiple

projects in a highly collaborative environment is essential.

Genentech is an Equal Opportunity Employer.
