

## Global Packaging Development Internship

Job ID: 00413165

### Job Function

Technical Functions and Maintenance

### Schedule

Full-time

### Location

United States-California  
South San Francisco

### Job type

Internship / Student

### Company/Division

Pharmaceutical

### Job Level

Entry Level

## Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

## The Position

The intern will work in the global Packaging Development group, supporting the Distribution Technology team by characterizing the mechanical properties of different materials used for packaging in the Roche network. The intern will also be using the information gathered in the laboratory to model those materials in silico, and to identify attributes critical to performance. This will help the Packaging Development group by optimizing the final package design proposed while accelerating development and qualification activities. A final report and presentation are expected at the end of the internship.

The intern will learn how to use multiple test equipment including but not limited to Universal (push and pull) test machines, compression, shock, drop and vibration machines, as well as measurement devices. The intern will also learn how to use software for documenting laboratory results, 3D modeling software and effect modeling software. Finally, the intern will get the opportunity to learn about and support other projects in Packaging Development.

## Who You Are

On-going Material Science or Mechanical Engineering baccalaureate degree in science  
Attention to detail

Great written and oral communication skills

Genentech is an Equal Opportunity Employer.
