Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

The Position

We are seeking an outstanding individual for the position of a Research Associate / Senior Research Associate within the Biochemical and Cellular Pharmacology department. The successful candidate will be responsible for supporting research projects in the disease therapeutic areas of immunology and/or immunotherapy as part of the biologics drug discovery program at our South San Francisco campus. The individual will be expected to work independently in developing and performing immunochemical, biochemical, and cell-based assays to support candidate selection, potency, efficacy, and pharmacokinetic studies as well as immunogenicity evaluation and pharmacodynamic biomarker measurements. In addition, the individual will incorporate automation into his/her daily work and apply novel technologies in assay development.

Who You Are

A BS or MS in Immunology, Tumor Biology, Cell Biology, Biochemistry, or a related field with at least 5 years of biopharmaceutical industry experience is required. Proven expertise in cell-based assays, biochemical ligand binding assays, and quantitative ELISAs is essential.

Experience in developing assays for quantification of antibodytherapeutics and protein biomarkers in various biological matrices is also required. The candidate should have basic immunologyand protein/antibody biochemistry knowledge. Experience with FACS, molecularbiology, or automation is a plus. The candidate should be self-motivated.He/she should possess excellent analytical and critical thinking skills, strongoral/written communication skills, quick learning capabilities, the ability tomultitask, and experience with interdepartmental or external collaborations.

Genentech is an Equal Opportunity Employer.
