Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

The Position

A new opportunity in Cell Banking for an E2/E3 level team member with a quality oriented background has been created. The applicant should have: a quality background with experience initiating and evaluating discrepancies, be proficient in the CR initiation and management process with skills to assist in new technology implementation, be capable of reviewing tickets as well as revising and authoring SOPs and other GMP documents, experience on teams in the preparation of Risk Management documentation for ongoing process improvement, willingness to support inspection activities and spend 30-40% of time performing/supporting GMP operations.

Who You Are

- o The position requires a highly motivated, independent team player.
- o Good organization, initiative, and a collaborative attitude are essential.
- o Prior experience working with Genentech quality systems is required.
- o 3-5 years applicable experience is required for the position
- o Knowledge of aseptic technique and experience with tissue culture is preferred.
- o Bachelor's degree in biological sciences or related field

Genentech is an Equal Opportunity Employer.
