Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

The Position

We are seeking candidates for a postdoctoral fellow position in the Ashkenazi lab to study the molecular mechanisms that control apoptosis activation in response to cell stress.

Who You Are

Applicants should have the following qualifications: (1) A recent PhD from an internationally reputable institution; (2) Extensive practical research experience in the fields of biochemistry and cell biology; (3) At least one first-author research publication in a prominent scientific journal; (4) A demonstrated ability to think critically and independently; (5) Strong written and oral communication skills; (6) A demonstrated ability to collaborate and interact effectively with scientific colleagues

Genentech is an Equal Opportunity Employer.
