## Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

## The Position

Analytical Operations provides assay support for Process Technical Development in GMP and R&D environments. The hire will be mainly responsible for performing HPLC, CE and LC/MS assays, data processing, and development of HPLC methods. Responsibilities also include assay reagent and instrument maintenance, and assay troubleshooting. Position requires working closely with other members of the department in a team setting, as well as extensive interaction with other departments. Handling of biological and chemical reagents is required.

## Who You Are

B.S./B.A. in biological or chemical sciences or equivalent with at least 3 years of relevant lab experience. Candidate must have strong communication skills, both written and oral, and be able to present work in a formal setting. Hands-on experience with HPLC is required, and familiarity with additional analytical technologies would be helpful. Experience with LC/MS is a plus. Knowledge of GMP compliance, HPLC software, and intermediate experience with EXCEL would be useful. Candidate must be self-motivated, able to work independently with minimal supervision, able to multi-task, and able to collaborate with other departments on development projects.

Genentech is an Equal Opportunity Employer.
