## Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

## The Position

### Job Responsibilities:

- **Provide hands-on maintenance, repair, fault diagnosis and troubleshooting of industrial electrical systems, including, but not limited to: VFDs, Soft and across the line motor starters, UPSs, Switchgear, Emergency Generators, Transformers, control systems, Standard and Emergency Lighting systems, etc.**
- **Safe operation of tools and testing equipment, and safe execution of work in the field.**
- **Timely completion of tasks and work orders with appropriate documentation according to applicable standards.**
- **Identify, anticipate, organize, and initiate acquisition of spare parts, safety equipment, engineering documents, service manuals, and test equipment.**
- **Ability to read and understand Electrical Drawings.**
- **Basic computer skills, with the ability to utilize the corporate intranet and applications, CMMS, and standard word processing and spreadsheet programs.**
- **Develop preventive maintenance and operational procedures for industrial electrical systems and equipment throughout the facility.**
- **Prepare and organize technical documentation, including red-lining documents to match as-built conditions.**

- **Coordinate contractors performing maintenance, repairs, modifications, and installation of electrical equipment.**
- **Inspect new installations and modifications by contractors and effect necessary changes to comply with company and industry standards.**
- **Communicate appropriately, verbally and in writing, with Engineering and other Plant department's to ensure satisfactory performance of electrical systems.**
- **Represent Utility Operations on multidisciplinary project teams.**

## **Who You Are**

### **Job Requirements:**

- **At a minimum, successful completion of an apprenticeship or technical school and substantial relevant on-the-job training required. Must be proficient in NEC, NETA, NFPA, and UBC standards and practices for industrial electrical systems.**
- **At least 5 years of progressive experience in industrial electrical systems maintenance with a proven performance record.**
- **Proficiency with electrical safety and energized system work practices.**
- **Work experience in cGMP Manufacturing environment preferred.**
- **Ability to climb ladders and lift at least 50 pounds.**
