Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

The Position

A position is available for an Engineer/Research Assistant(N5) in the Purification Development department. The successful candidate will support the development and implementation of recombinant protein purification processes from laboratory to manufacturing scale. This will include process optimization and product characterization as well the support of high throughput experiments and lab automation activities within the Purification Development department. Activities will include the development of homogenization, centrifugation, chromatography & filtration operations, analytical methods such as electrophoresis and HPLC and the design and execution of high throughput experiments using robotic systems.

Who You Are

A BS or MS in Biochemistry, Chemistry, Chemical Engineering or a related field. An understanding of separation techniques in relation to protein purification as well as knowledge of analytical techniques applicable to protein purification is preferred. Experience with the design, execution and analysis of high-throughput experiments is also desirable. The successful candidate should possess good problem solving, organizational and documentation skills. The successful candidate should be self-motivated and able to work independently as well as in a team environment. Strong interpersonal, collaborative and

communicationskills are required.

Genentech is an Equal Opportunity Employer.
