## **Who We Are**

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

## **The Position**

The Manager / Senior Manager will support the late stage PPP team as it delivers on a range of projects in support the late stage oncology portfolio. Key activities for which PPP is responsible include:

- Portfolio Management and Reporting
- LifeCycle Team, Planning, Governance and Decision Support
- Strategic Projects at the TA Level and Cross-Portfolio
- Governance / Support for Late Stage Portfolio Committee

The role requires ability to provide strategic, analytical and systems support to late stage

teams, TA heads, and other stakeholders in the Roche organization.

## **Responsibilities**

Representative responsibilities associated with the role are detailed below:

- Portfolio Management and Reporting
  - Participate on multiple lifecycle teams and ensure that portfolio reflects ongoing investments in programs
  - Prepare quarterly reports on progress of portfolio and implications (incl. strategic context) for senior managers
- LifeCycle Team, Planning, Governance and Decision Support
  - Consult with lifecycle teams to provide decision analysis and other analytic and strategic support
  - Support development of business cases for all investments/changes, including valuations
  - Facilitate annual prioritization, goal setting, lifecycle planning and business planning processes
  - Advise teams on internal governance processes associated with changes/new investments
- Strategic Projects at the TA Level and Cross-Portfolio
  - Support development of molecule, pathway and disease area strategies
  - Frame portfolio issues and conduct gap analyses to enable management to make informed and timely decisions, including corporate goal setting and portfolio optimization
  - Facilitate TA level opportunity prioritization and strategic context
  - Support partnering opportunities at the TA level
- Governance / Support for Late Stage Portfolio Committee
  - Work with development teams to ensure that decisions go through appropriate governance
  - Advise teams and stakeholders to ensure decisions are aligned with portfolio priorities

## **Job Skills and Expectations**

- A strong understanding of pharmaceutical/biotech landscape, R&D trends, business strategy and markets in major disease areas
- Demonstrated success in working with biotech or Pharma management and teams in Research, Development and Commercial functions
- The ability to build cross-functional partnerships and influence without authority
- Strong analytic skills and complex problem solving ability
- The ability to draw conclusions from analytics, articulate the key findings to management and teams
- Ability to lead and facilitate cross functional teams

## **Who You Are**

### **Requirements**

- Advanced degree in science, engineering, business or a related field; ideally with a degree in the life sciences. Experience or background in oncology is a plus.
- At least 3 years of experience in biotech, pharmaceuticals or a related field. Experience in strategic planning and analytics is strongly desirable.
- Ideal candidate will have 2-3 years of experience in management consulting, market planning, investment banking or business development – with demonstrated career progression in role.
- Evidence of strong strategic thinking, communication, analytics/modeling, planning and organizational skills required. Interviews will include case studies.

Genentech is an Equal Opportunity Employer.
