## **Who We Are**

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

## **The Position**

Supervisor1/ Supervisor 2

### **RESPONSIBILITIES:**

Ensure success of operations on a day-to-day basis. Direct, plan, organize and control operations. Primarily responsible for ensuring required levels of safety, quality, and productivity are met. Support Operations by working effectively within the management team to execute goals, objectives, and tasks to achieve desired results. Direct shift operations by planning, prioritizing tasks and assignments, and deploying resources in alignment with the production schedule. Provide leadership and technical oversight to staff members. Develop and/or improve staff capabilities in response to department needs and expectations. Provide cross-functional coordination and issue resolution across operations, other groups and/or projects. Anticipate potential problems or vulnerabilities in processes or systems and suggest solutions. Manage the implementation of solutions to increase efficiency and effectiveness of the shift towards meeting department goals.

## **Who You Are**

### **REQUIREMENTS:**

Supervisor will have an AA or BS/BA degree in life sciences, physical

sciences, engineering, or equivalent with at least 3 years of relevant bio/pharmaceutical experience. Strong interpersonal, communication and problem solving skills are required as well as successful demonstration of leadership, teamwork and technical expertise. A fundamental, working knowledge of safety, quality systems, and quality assurance concepts is required including the application of current Good Manufacturing Practices (cGMPs). Position requires familiarity with manufacturing processes and operations, industrial automation (e.g., distributed control and PLC-based systems), equipment/facilities validation, analytical techniques and experimental designs used for process validation. Background in Cell Culture Fermentation is required. Prior experience in Cell Culture manufacturing is preferred.

Genentech is an Equal Opportunity Employer.
