## Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

## The Position

Medical Communications Scientist is able to communicate relevant, timely, accurate, and balanced clinical information on Genentech's products, positively influencing their safe and effective use.

### DESCRIPTION:

The Medical Communications Scientist is able to communicate relevant, timely, accurate, and balanced clinical information on Genentech's products, positively influencing their safe and effective use. Able to evaluate medical literature as well as write, review, edit, and approve medical content to ensure appropriate clinical context and accuracy. Provides medical responses through various communication channels (response documents, web-based media, scientific meetings, etc.). Is also able to provide training relevant to Genentech's product portfolio. Has a basic understanding of legal/regulatory topics adequate to describe the basis of Medical Affairs policies and procedures, and applies this knowledge to the review of promotional materials and Medical Affairs documents. The Medical Communications Scientist is able to assist in the development and implementation of Medical Communication policies and procedures, establish and supervise the work flow for delegated projects, and assess incoming

request information to determine required action and triage based on internal policies and procedures. Can convey and acquire medical information as well as communicate and work effectively with members of the Medical Communications staff and customers which include but are not limited to: Sales, Marketing, Managed Care, Clinical Development, Product Safety, Regulatory, Legal, and Corporate Partners.
