

Senior Research Associate, Early Stage Cell Culture

Job ID: 00414450

Job Function

Pharmaceutics/Process Research

Schedule

Full-time

Location

United States-California
South San Francisco

Job type

Regular Employee

Company/Division

Pharmaceutical

Job Level

Experienced

Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

The Position

We are seeking a collaborative individual to contribute to a team that is responsible for generating recombinant proteins by transient transfection of mammalian cells. The candidate's primary responsibility will be high throughput transient protein production to support research and development projects. The tasks will include those associated with coordinating and performing cell culture operations (i.e. set up, inoculate, monitor, harvest and clean fermentors) as well as experiment data recording, collection and analysis. He /she will display a strong focus on collaboration, attention to detail, proficiency with multi-tasking and analytical ability. The secondary responsibility of this candidate is to optimize our transient transfection process. This includes identifying and solving technical issues, performing process development experiments, and evaluating and implementing new technology/instrumentation based on scientific literature and industry trends. The right candidate will have experience with supervisory or management responsibilities.

Who You Are

Applicants should have a thorough understanding of process development, cell biology and extensive experience with mammalian cell culture. Experience with operating stirred tank or wave bioreactors is highly desired. Must be able to lift 30 lbs on a routine basis. Individuals with training, supervisory or management experience who are also interested in applying

their cell culture skills are encouraged to apply.

Education/Experience: BS or MS in Biology, Biochemistry, Chemical Engineering/Biological Engineering or related field with at least 5-8 years relevant experience.

Genentech is an Equal Opportunity Employer.
