

Senior Research Associate- Small Molecule Formulation

Job ID: 00414566

Job Function

Pharmaceutics/Process Research

Schedule

Full-time

Location

United States-California
South San Francisco

Job type

Regular Employee

Company/Division

Pharmaceutical

Job Level

Experienced

Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

The Position

We are seeking a highly qualified and motivated individual to join the Small Molecule Pharmaceutics and Delivery group at Genentech. The candidate will be responsible for conducting pre-formulation and formulation evaluation of research molecules and clinical development compounds, such as solubility measurement, stability test, recrystallization, granulation evaluation, tablet development. He/she will also work on characterizing salts and polymorphs of small-molecule compounds; developing pre-clinical dosing formulations and supporting Discovery Biology, Efficacy, and Safety Evaluation of new chemical entities. The individual will be involved in formulation development in support of Clinical trials, such as excipient screening, prototype and market formulation development and technical transfer, and solid state stability monitoring.

Who You Are

Candidate must have a good knowledge in Pharmaceutical Sciences. Experience in formulation and process development of parenteral or solid dosage forms is desired. The successful candidate must have hands-on experience in a pharmaceutical formulation/pre-formulation lab. Experience in HPLC, thermal analysis, PXRD, particle size analysis, FTIR, and other lab equipments are required. A successful candidate should also be detailed-oriented and have good communication skills. The job candidate should have a B.S. or M.S. in Pharmaceutics, Chemistry, or related areas with 2 to 5 years of experience in the

Pharmaceutical Industry.

Genentech is an Equal Opportunity Employer.
