Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

The Position

Utilities Frontline group is looking for candidates in 2013 that wants real-world learning opportunity in the Pharmaceutical/Biotechnology Industry. The candidate's responsibilities include assisting Utility Frontline (UFL) Automation Engineer in

- 1) Lean Six Sigma and other continuous improvement projects
- 2) Implementation plan and test protocol generations
- 3) Change implementation
- 4) Programming of PLC and HMI

Candidates should be comfortable with some repetitive administrative task. Candidate should also be able to follow appropriate SOPs and other written procedures and document all work with great attention to detail. In return, candidate will acquire hands-on skills and knowledge of Automation, and Industrial Control Engineering used in the Pharmaceutical/Biotechnology Industry.

Job Responsibilities:

- Provide assistance to the AE with data collection for Lean Six Sigma project
- Provide assistance to the AE with the various duties on a day-to-day basis
- Provide administrative assistance to AE such as test protocol generation and change

implementation documents development.

- Develop an understanding of Automation system and utilize the acquired skills to projects assigned.

Who You Are

You're someone who wants to influence your own career development. You're looking for an opportunity to explore interests in a multi-discipline engineering group and where a job title is not considered the final definition of whom you are, but the starting point.

You are a self-starter and possess the curiosity and desire to learn new skills. You are collaborative, accountable and driven for results.

You should:

- Have a minimum GPA of 3.0
- Have completed at least one year of college level education
- Be comfortable with occasionally lifting up to 15lbs.
- Be comfortable with using MS Word and Excel and other MS Office Suite application
- Basic verbal and written communication skills needed to accomplish assigned tasks.
- Ability to work under frequent supervision to complete assigned tasks in a timely manner.
- Be able to commit to between 8 to 20 hours per week on the Automation related tasks while class is in session or during academic recess.

Genentech is an Equal Opportunity Employer.
