## **Who We Are**

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

## **The Position**

Adhere to all plant safety policies and procedures and proactively identify unsafe conditions  
Perform safety and housekeeping audits as required.

Assist in set up, change over, and test run equipment for various-sized vials and packages as required.

Supporting the Operations Specialist, Maintenance, and/or outside services in the repair, maintenance, and calibration of Genentech systems as required.

Perform training of other Technicians.

Assist in the development of plant SOP's and training materials

Execute production recipes, check-in equipment, and perform material movements using automated computer software applications (SAP and MES systems).

Operate all formulation, sterile filling, inspection, and final vial packaging equipment in the plant.

Perform material handling in the plant as required.

Perform preparation of sterile components.

Assist in the cleaning, set-up, sterilization, and disassembly on a variety of processing equipment.

Perform bulk thaw, dilution, and formulation operations.

Performing manual inspection of empty vials and filled product with a focus on quality and efficiency.

Conduct environmental monitoring activities in the manufacturing areas as required.

Prior to start-up, during processing, and at the completion of the manufacturing process,

perform all documentation and clerical functions to provide the proper accountability and traceability of components and finished product.

At the start and finish of each shift, report and make recommendations regarding equipment, supplies, required repairs,

Process concerns, safety concerns, and areas for improvement in reliability, yield, and efficiency.

Work effectively and efficiently in a team-oriented environment to ensure maximum and high-quality output.

Perform cleaning and housekeeping duties as required.
