

## **Associate Scientist / Scientist, Drug Delivery**

Job ID: 00414713

### **Job Function**

Biologics Drug Product Production

### **Schedule**

Full-time

### **Location**

United States-California  
South San Francisco

### **Job type**

Regular Employee

### **Company/Division**

Pharmaceutical

### **Job Level**

Experienced

## **Who We Are**

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

## **The Position**

This position involves research, development and commercialization of technology for sustained delivery of therapeutic proteins. The successful candidate will work as part of a multi-disciplinary team evaluating strategies for improved treatment options for ocular disease. Responsibilities will include the design and execution of in vitro release experiments, evaluation of drug compatibility with formulation and device components, and research on mechanisms of drug release. Effective utilization of technical staff to support these functions is required. Projects may also include molecule engineering to enhance delivery effectiveness. Oral presentations to review bodies, preparation of written technical reports, and submission of external publications and patent applications when appropriate, are expected.

## **Who You Are**

### **Requirements:**

A Ph.D. in Materials Science, Chemical Engineering, Pharmaceutical Sciences or related field with 1-3 years of research experience post-Ph.D. is preferred. A record of accomplishment as shown by scientific publications and/or patent applications is required.

Experience with protein delivery systems and analytical methodology for protein characterization, including HPLC - SEC and IEC - is desirable. The ability to work in a fast-

paced, highly collaborative environment is essential. Excellent oral and written communication skills are required, and previous successful experience with management of research assistants is a plus.

Genentech is an Equal Opportunity Employer.
