

The study gave hope to **Fred**.

He joined because his medicines were not working as well as he wanted, even though there wasn't a guarantee that the study drug would work.

And for **Jasmine**, she joined the study for her daughter and granddaughter.

She hopes this potential treatment can be a future option for her and her family.

QUESTIONS TO ASK YOUR DOCTOR

so you can make an informed decision. There are many reasons why a study may or may not be right for you.

- Why is the study being done?
- How will you support me?
- Will my insurance cover the study?
- What are the possible short and long-term side effects?
- What are my other options to help me with my illness?
- How much will it cost?
- How much time will it take?
- How will I know if it's working?
- What kind of tests will I receive if I participate?

YOU decide what is right for **YOU**.

IS A CLINICAL RESEARCH STUDY **RIGHT FOR ME?**

Clinical research studies find out if a study drug **works and is safe.**

Some of these drugs may be new in development and other drugs may have been around for a while, but are now being studied in different illnesses.

In building community trust with clinical research,

many levels of oversight and protection have been put in place to protect patients from harm.

Studies are designed to go beyond general care.

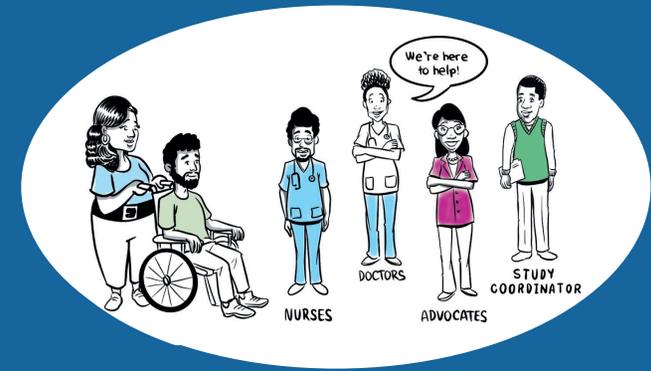

As part of a study, doctors follow a protocol, which is a manual approved by health experts and regulators to do the study. Your healthcare team will work to make sure your medical needs are met whether you choose to join a clinical study or not.

Diverse representation matters in clinical research studies to understand how potential new drugs might work in different patient populations.

YET YOU MIGHT BE ASKING, "WHAT'S IN IT FOR ME?"

For George, it provided a level of care that he needed.

It meant he was able to spend more time with his healthcare team and get all of his questions answered.

Lupe is a working mom worried about how much travel and child care would cost if she joins a clinical study.

For Lupe to consider joining a study, she asked her doctor if financial assistance is available to cover some or all study costs.
