

## Postdoctoral Research Fellow - Discovery Chemistry

Job ID: 201812-131634

### Job Function

Research

### Location

South San Francisco  
California  
United States of America

### Schedule

Full time

### Job type

Temporary (Fixed Term)

### Company/Division

Pharmaceuticals

### Job Level

Individual contributor

---

## The Position

A postdoctoral position is available in the department of Medicinal Chemistry. The position will focus on developing new strategies for protein bioconjugation using cutting-edge technologies in catalysis and organic methodology. Projects will include applying new methods to advance structural biology to help elucidate protein structure, phenotypic screening to identify protein targets of interest, and aid in the construction of new therapeutic modalities.

The ideal candidate will have a background in synthetic organic chemistry and/or chemical biology with a proven track-record of success as demonstrated by publications in high-impact, peer-reviewed journals. Teamwork and strong communication skills are essential as the successful candidate will be working in an interdisciplinary team across the broader Genentech research organization.

## Who We Are

A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 40 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. Genentech has multiple therapies on the market for cancer & other serious illnesses. Please take this opportunity to learn about Genentech where we believe that our employees are our most important asset & are

dedicated to remaining a great place to work.

Genentech is an equal opportunity employer & prohibits unlawful discrimination based on race, color, religion, gender, sexual orientation, gender identity/expression, national origin/ancestry, age, disability, marital & veteran status. For more information about equal employment opportunity, visit our [Genentech Careers page](#).
