## The Position

### Key Responsibilities for the Medical Science Director:

In this role the Medical Science Directors will be required to perform one or more of the following activities within US Medical Affairs BioOncology, Cross-Portfolio group

- Design, execute, and monitor medical strategies, plans and tactics spanning the lifecycle, including but not limited to:
  - thought leader interactions
  - publications
  - medical content creation and review
  - scientific exchange/engagement and scientific communications/collaborations
  - medical education
  - scientific congress and booth support
  - evaluate, synthesize, and visualize clinical and economic data and develop written scientific communication
  - identify access-related medical issues and opportunities
  - Actively participate and contribute to relevant teams

### Key Accountabilities for all Medical Science Directors:

- Accountable for implementing strategy through medical tactics, tapping into the network of relevant expertise and insights
- Contribute medical expertise to Genentech work products and coach/mentor others as needed
- Facilitate sharing of information within, across and outside of Medical Affairs to enable medical progress
- Maintain an in-depth understanding of relevant medical strategy and clinical, patient/caregiver, payer and healthcare/market landscape

- Act as a guardian for high standards of compliance, ethics and safety; putting patients at the center of all actions

### **Qualifications:**

- Advanced Clinical/Science Degree Required (e.g. PharmD, PhD, etc.)

### **Required Experience:**

- 3-10 years of pharmaceutical/biotechnology relevant industry experience preferred - preferably in Medical Affairs or product development or is a recognized expert in the field or therapeutic area (with a minimum of 2 years' clinical experience)
- Understanding of and/or previous experience with Phase I - III and/or Phase IV drug development
- Considerable experience in the principles and techniques of data analysis, interpretation and clinical relevance, and medical writing
- Proven record in developing strong relationships with external constituents (therapeutic area experts, external organizations, etc.) preferred
- Proven track record of meeting or exceeding objectives and goals

### **Skills:**

- Strong customer orientation/focus
- Works well within teams and is effective in collaborating with others internally and externally
- Analytical and problem-solving capabilities and skills. Has demonstrated the ability to anticipate and solve problems of moderate complexity and scope e.g. evaluate, interpret and present highly complex data
- Communication and presentation skills; highly effective at summarizing and presenting key considerations and decision-points
- Strong business acumen: knows the industry, key competitors, marketplace factors/dynamics
- Ability to effectively and efficiently manage multiple priorities
- Good interpersonal and influencing skills; can effectively and quickly establish rapport with all key internal/external partners and stakeholders and influence without authority
- Good negotiation skills: can drive discussions and decisions towards desired results
- Understanding of legal and regulatory considerations impacting pharma/biotech industry and ability and judgement to apply principles to daily activities
- Strong attention-to-detail
- Business travel, by air or car, is required for regular internal and external business meetings
