The Position

IT Business Partner

At Genentech/Roche, we believe every employee makes a difference. We are passionate about transforming patients' lives. We are confident in both decision and action; we believe that good business means a better world.

As the Integrated Service Owner (ISO) you are a leader within the ERP North America Team, who is passionate about delivering solutions. We are looking for a highly organized and motivated individual who will support delivering digital strategy initiatives. Key focus areas include assessing various technologies, reviewing digital solutions, design, solution piloting and implementation.

In this role, you will ensure the ERP team understands the desired experience of the customer and delivers the required services. You will ensure effective and appropriate mapping of business needs to technology capabilities.

As the Integrated Service Owner (ISO), Key responsibilities include, but are not limited to, the following:

- **Conduct primary research into the emerging technologies and practices**
- **Develop comprehensive understanding of emerging technologies and design forward-looking technology strategies**
- **Work directly with clients to understand key business drivers, challenges and future growth opportunities. Develop clear requirement and solution proposals that clearly outline business challenges and goals. Influence technology selection based on best fit for purpose**
- **Manage aspects of POC's in Agile SDLC methodology**

- Collaborate with solution architects and business analysts to identify and implement process improvements for solution delivery and support of new and existing solutions
- Positioning GIS services in the ecosystem of complementary and competing external services
- Participates in the Leadership Team of the North America ERP Team

Who you are

- We are looking for someone with a Bachelor's degree, Master's degree preferred but not required
- 10 + years of experience in a similar role
- Solid technical background with understanding and/or hands-on experience preferred
- SAP experience as an Architect, Principal Solution Designer or Analyst in multiple business process disciplines is key to this role
- Business Relationship management and partnering expertise
- Experience evaluating and strong knowledge of today's digital technology ecosystem and capabilities with a mind to enable business value and transformation
- Experience with S/4 HANA, Cloud or Mobility
- Demonstrated knowledge of blockchain technologies such as Hyperledger, Ethereum, Corda and key blockchain concepts such as smart contracts is highly desired
- Expertise with IoT and Predictive Analytics is highly desired
- Candidates should have software development experience
- An interest in learning new technologies and languages
- Entrepreneurial spirit and passion to work within a fast-paced, rapidly changing environment
- Experience with or driving production comparison evaluations via RFP's is desired
- Very strong verbal, written and presentation skills
- Flexibility to travel for up to 20% (both domestic & internationally)
