Entry Level

The Position

Start Date: Summer 2021

Work Hours: 40 hours per week

Length of Assignment: 3 months

Education Level: Bachelor's (must be enrolled in or completed their 2nd year).

Preferred Majors/Disciplines: Engineering.

Given the current uncertainty of the global pandemic and work from home situation for 2021, this internship is currently planned to be virtual with the option for interns to work remotely from within the U.S. Borders. We will keep candidates informed if this changes.

At this time, due to the ever changing situation concerning the COVID-19 global pandemic, for our summer 2021 internship program we will only consider international candidates who are currently in the US and will remain in the US for the duration of the internship.

You may not see us, but our work is all around you; from our Hard Services that ensure our buildings and science equipment are operating correctly, safely, and securely, to our Soft Services that keep our site looking sharp while promoting sustainability. We support the SSF and Dixon campuses and some regional sites.

Job Description/Responsibilities

- Update engineering drawings.
- VFD inventory/parameter download and manage data storage.
- Leak detection/prevention/installing equipment.
- HVAC terminal boxes inventory and upload BAS point names to FDH.
Requirements/Qualifications

- Knowledge overview of building infrastructure and support systems including utility distribution systems, gases, HVAC or similar systems.
- Must be independent worker and self-starter and motivated to work with a team
- Candidates must have good organizational, verbal and written communication skills.
- Possess an intuitive sense for working safely in a potentially risky environment.
- Ability to read and understand system drawings and P&ID’s associated with utility systems.
- Computer Skills: CMMS(SAP), Microsoft Office Suite.

Who We Are

Genentech, a member of the Roche group and founder of the biotechnology industry, is dedicated to pursuing groundbreaking science to discover and develop medicines for people with serious and life-threatening diseases. To solve the world's most complex health challenges, we ask bigger questions that challenge our industry and the boundaries of science to transform society. Our transformational discoveries include the first targeted antibody for cancer and the first medicine for primary progressive multiple sclerosis.

Diversity and Inclusion (D&I) are critical to the success of our company and our impact on society. We believe that by championing diversity of background, thought and experience, we can foster a sense of belonging and provide an environment where every employee feels valued, included, and able to contribute their best for the patients we serve. We’re focused on attracting, retaining, developing and advancing our people to their full potential by rewarding bold ways of thinking and integrating inclusive behaviors into every aspect of our work.

Genentech is an equal opportunity employer & prohibits unlawful discrimination based on race, color, religion, gender, sexual orientation, gender identity/expression, national origin/ancestry, age, disability, marital & veteran status. For more information about equal employment opportunity, visit our Genentech Careers page.
