Ceftriaxone sodium

1. Product and Company Identification

Product name: Ceftriaxone sodium
Product code: 04 0597 3
Company information:
Enquiries:
Hoffmann-La Roche Inc.
340 Kingsland Street
USA-Nutley, N.J. 07110-1199
United States of America
Phone: 001-973/235 50 00
US Emergency phone: (800)-827-6243
US Chemtrec phone: (800)-424-9300

Local representation:
Roche Nutley Inventory Code: 20140
Roche number: Ro 13-9904/015
CAS number: 104376-79-6 with water of crystallization
74578-69-1 anhydrous
Synonyms:
- ROCEPHIN(R)
- Ceftriaxone disodium salt
- ROCEPHIN substance sterile
- Ceftriaxone sodium crude (code no. 04 0595 7)
Characterization:
pharmaceutical active substance in the class of cephalosporines

2. Composition/Information on ingredients

Chemical name:
- (6R,7R)-7-[(Z)-2-(2-Amino-4-thiazolyl)-2-(methoxyimino)acetamido]-3-{{(2,5-dihydro-6-hydroxy-2-methyl-5-oxo-as-triazin-3-yl)thio[methyl]}-8-oxo-5-thia-1-aza-bicyclo-[4.2.0]oct-2-ene-2-carboxylic acid disodium salt hydrate
Percentage: 95 %

Date: 1.12.00/CSE (SEISMO)  Replacing edition of: 23.8.00  Page: 1/7
### 3. Hazards identification

**Emergency Overview**

<table>
<thead>
<tr>
<th>Feature</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Form</td>
<td>crystalline powder</td>
</tr>
<tr>
<td>Color</td>
<td>white to yellowish</td>
</tr>
<tr>
<td>Odor</td>
<td>none to faint</td>
</tr>
</tbody>
</table>

**Hazard Overview**

- May cause allergic reactions.
- Dust explosion hazard
- Violent decomposition can occur when heated or in a fire

**Potential Health Effects**

- Exposure: Inhalation, Ingestion, Skin contact, Eye contact
- Target Organs: skin, kidneys, liver, gastrointestinal system, Central nervous system, Hematopoietic/blood system

- Acute Effects: May cause allergic reactions., May cause central nervous system effects., Signs and symptoms may include headache, dizziness, drowsiness, fatigue and lack of muscular coordination., May cause headache., May cause hepatic (liver) system effects., Signs and symptoms may include elevation of liver enzyme levels and jaundice (yellowing of the skin and eyes),., May cause renal (kidney) system effects., Signs and symptoms may include urine retention, increase or decrease in urine production, painful urination and presence of blood in urine., May cause gastrointestinal effects., Signs and symptoms may include nausea, vomiting, diarrhea, constipation, cramps, and loss of appetite., May cause blood system changes.

- Chronic Effects: No adverse effects known

**Additional Health Information**

- Carcinogenicity: not listed by NTP, IARC or OSHA
- Conditions Aggravated: Hypersensitivity to penicillin and other antibiotics.
- Additional Health Hazard Information: Since this material has been shown to be excreted in breast milk, nursing mothers should exercise caution regarding exposure.
4. First-aid measures

Eye contact  - rinse with tap water for 10 minutes - open eyelids forcibly
Skin contact  - remove contaminated clothes, wash affected skin with water and soap - do not use any solvents
Inhalation  - remove the casualty to fresh air and keep him/her calm
  - consult physician

Note to physician  - treat symptomatically
  - in case of strong sensitization against Cephalosporines anaphylaxis and asthma are possible:
    weak cases:
    - Antihistaminica i.v.
    - in case of asthma topical steroids and inhalative β-Mimetica
    severe cases:
    - Adrenalin 0.3 - 0.5 mg i.v.
    - Antihistaminica i.v.
    - high dosage of steroids i.v.
    - in case of asthma additional inhalation with topical steroids and β-Mimetica

5. Fire-fighting measures

Suitable extinguishing media  - water spray jet, dry powder, foam, carbon dioxide
Flash point (liquid)  not applicable
Specific hazards  - formation of toxic and corrosive combustion gases (nitrogen oxides, sulfur oxides) possible
  - consider dust explosion hazard
  - substance is hazardous for water: contain fire-fighting wastewater
Protection of fire-fighters  - precipitate gases/vapours/mists with water spray

6. Accidental release measures

Environmental protection  - do not allow to enter drains or waterways
Methods for cleaning up  - collect spilled material (avoid dust formation) and hand over to waste removal in sealed containers
  - clean contaminated area/containers with a alkaline cleaner
### 7. Handling and storage

#### Handling
- **Technical measures**
  - processing only in closed rooms with reduced pressure and high efficiency particulate air filter (HEPA filter; GMP)
  - avoid dust formation; high dust explosion hazard
  - local exhaust ventilation necessary
  - take precautionary measures against electrostatic charging

- **Suitable materials**
  - glass, stainless steel

#### Storage
- **Validity**
  - 24 months, ≤ 25 °C,

- **Packaging materials**
  - in sealed containers
  - tightly closing; material: stainless steel, aluminium, enamel

- **Note**
  - highly active substance: risk of cross contamination
  - avoid open handling

### 8. Exposure controls/Personal protection

#### Engineering Measures
- see 7.

#### Monitoring
- **Threshold value (Roche) air**
  - STEL: 0.06 mg/m³ (4 x 30 min)
  - IOEL: 0.02 mg/m³ (sensitiser)

- **Analytics**
  - air: sampling on paper filter and microbiological antibiotic test
  - surfaces: wipe test with paper filter and microbiological antibiotic test

#### Personal protective equipment
- **Respiratory protection**
  - Respiratory protection is recommended as a precaution to minimize exposure. Effective engineering controls are considered to be the primary means to control worker exposure. Respiratory protection should not substitute for feasible engineering controls.
  - in case of open handling or accidental release: particle mask or respirator with independent air supply

- **Hand protection**
  - protective gloves

- **Eye protection**
  - safety glasses

- **Body protection**
  - disposable protective clothing including gloves, cap and overshoes

- **General protective and hygiene measures**
  - instruction of employees mandatory
  - shower after work mandatory

- **Remarks**
  - allergic persons should possibly be excluded from any occupational to Ceftriaxone (evaluation of aptitude by physician)
Ceftriaxone sodium

9. Physical and chemical properties

Color                  white to yellowish
Form                   crystalline powder
Odor                   none to faint
Molecular mass         661.59 g/mol
Empirical formula      C₁₈H₁₈N₄Na₂O₇S₃ • 3.5H₂O
Bulk density           0.3 kg/l
Solubility             470'000 mg/l, water (22 °C)
                        32'000 mg/l, methanol (22 °C)
                        200 mg/l, acetone (22 °C)
Partition coefficient   log Pₒw = 0.025 (octanol/water) pH 2.0
pH value               6.0 to 7.5 (10 % aqueous solution)
Melting temperature    > 155 °C (with decomposition)
Note                   - hygroscopic

10. Stability and reactivity

Conditions to avoid    - humidity
                        - warming
                        - light
Materials to avoid      - oxidizing agents, heavy metals

11. Toxicological information

Acute toxicity         - LD₅₀ > 10'000 mg/kg (oral, mouse)
                        - LD₅₀ > 10'000 mg/kg (oral, rat)
                        - LD₅₀ > 2'000 mg/kg (i.v., several species)
Sensitization         - may sensitize (allergy)
Chronic toxicity       - good tolerance during several weeks application (rat, dog, baboon)
Mutagenicity           - not mutagenic (OECD No. 474 (Micronucleus Test))
                        - not mutagenic (Ames test)
Reproduction toxicity  - not teratogenic
                        - not embryotoxic
Note                  - dosage: daily clinical dose 1 - 2 g (human)
                        - half-life of elimination: approx. 8 hours
                        - persons sensitized to cephalosporin or penicillin may show allergic
                          symptoms like skin reactions (exanthema), urticaria, asthma,
                          rhino-conjunctivitis and hematological alterations
### 12. Ecological information

<table>
<thead>
<tr>
<th>Inherent biodegradability</th>
<th>not inherently biodegradable 0 %, 28 days (MITI Test II, OECD No. 302 C)</th>

</table>

### 13. Disposal considerations

| Waste from residues       | small amounts (up to approx. 100 grams): dissolve in water and decompose with sodium hydroxide or prolonged boiling, afterwards the solution can be drained |
|                          | large amounts: incinerate in qualified installation with flue gas scrubbing |
|                          | observe local/national regulations regarding waste disposal               |
| RCRA waste               | not regulated under RCRA                                                 |

### 14. Transport information

| Note                      | not classified by transport regulations, proper shipping name non-regulated |

### 15. Regulatory information

| TSCA Status               | FDA Exemption - not on inventory                                          |
| Reporting Requirements    | The United States Environmental Protection Agency (USEPA) has not established a Reportable Quantity (RQ) for releases of this material. |
|                          | In New Jersey, report all releases which are likely to endanger the public health, harm the environment or cause a complaint to the NJDEPE Hotline (1-609-292-5560) and to local officials. |
|                          | State and local regulations vary and may impose additional reporting requirements. |
## 16. Other information
